

# Word Scramble Prediction

## Purpose

- Provides students with a reading purpose.
- Introduces key terms.
- Allows students to make connections.

1. Identify some words from an upcoming reading and scatters them randomly and creatively on a paper or projected on the screen.

2. Students read the scramble and write a prediction about what they think will happen in the text, or what the text will be about, using the words. Students can share their predictions with a partner, group, or whole class.

\* Students can also make text to text, text to self, or text to world connections with the words displayed on the page/screen.

3. The class then reads the text.

4. Students then discuss whose prediction/connection was the closest.
